Professional Summary

Full-stack developer with 5+ years of expertise in React.js, Node.js, and cloud-native solutions. Proven track record in building AI platforms, gamified engagement systems and secure financial applications. Specializes in developing high-performance applications with SEO optimized using modern stacks including Next.js, Nest.js and AWS. Delivers measurable results through technical excellence and cross-functional collaboration.

Relevant Engagements and Projects

Sr. Full Stack Developer | Information Care Pvt. Ltd. (2025 Oct - current)

Enterprise Dynamic Enrollment & Form Orchestration System

- Designed a flexible data layer using PostgreSQL JSONB to support infinite custom fields without requiring database migrations, maintaining system stability during frequent form updates.
- Implemented a robust Draft-Save mechanism using Redis and local storage, allowing students to resume complex, multi-step enrollments across different sessions and devices.
- Ensured full data privacy compliance by implementing field-level encryption for sensitive student data and a robust Role-Based Access Control (RBAC) system to restrict PII access to authorized administrative personnel only.
- Developed a highly reusable, recursive React component library for the form builder, reducing frontend technical debt and allowing for deeply nested conditional logic without performance lag.

My Palika Portal

- Led the end-to-end development of a municipal portal digitizing 15+ core services (Business Registration, Ijalas, Disaster Reporting) to streamline ward-level administration.
- Developed robust "Sifarish" and Appointment systems with automated routing for seamless document verification between citizens and officials.
- Implemented advanced visualization for "Plans and Budget" and "Ward Profiles," enabling local authorities to manage and analyze large-scale public datasets.

- Spearheaded RBAC and secure API integrations for Subsidy and Registration modules, ensuring 100% compliance with government data privacy standards.

Nepal Copyright Registrar's Office System

- Engineered an end-to-end digital platform for copyrighting literary, musical, and software works in full alignment with the Nepal Copyright Act.
- Developed a high-integrity storage system for source code and manuscripts using advanced encryption to secure sensitive intellectual property.
- Designed a multi-stage engine for application processing and certificate issuance, significantly reducing administrative overhead.
- Spearheaded digital signature integration and verification protocols to establish legally binding proof of authorship and public records.

Full Stack Developer | Qualz AI (2024 April - 2025 July)
AI Co-pilot for Qualitative Research and Interview Platform

- Architected analytics dashboard with real-time data visualization, improving researcher efficiency.
- Engineered subscription system with Stripe integration processing.
- Implemented RBAC system for user roles using Nest.js middleware.
- Developed real-time AI chatbot with WebSocket integration reducing response latency.
- Containerized services using Docker achieving 99.8% uptime on AWS (EC2, RDS, Lambda)

Full Stack Developer | 3radical (Jan 2023 - Mar 2024)
Gamified Customer Engagement Platform

- Built reusable React components accelerating feature development of games and web applications.
- Optimized MySQL queries reducing API response times.
- Implemented Phaser.js game mechanics increasing user engagements.
- Automated CI/CD pipeline cutting deployment time.

Full Stack Developer | AMNIL Technologies (Aug 2021 - Dec 2022)

Banking Intranet System

- Led development of real-time employee management system serving 5k+ bank employees.
- Reduced server load by 60% through Redis caching implementation.

- Containerized microservices using Docker improving deployment efficiency.

AI Chatbot System

- Developed NLP-driven chatbot handling daily conversations with a very high resolution rate.
- Created analytics dashboard enabling data-driven optimizations to conversation flows.

Training Management System

- Implemented OIDC authentication securing sensitive budget allocation data

Full Stack Developer | Business Pazes (Jan 2019 - Jul 2021)
E-commerce Platform

- Developed a high-traffic e-commerce platform processing high daily orders.
- Implemented product recommendation engine increasing average order value.
- Optimized MySQL database schema improving query performance.

Technical Stack

Frontend: React.js, Reactive Native, Next.js, TypeScript, Redux, TanStack, Tailwind CSS, Recharts, Framer-motion, Recharts, Material UI, Chakra UI, Shadcn, Ant Design, GraphQL, RESTful APIs, SSR, SSG, 3.js

Backend: Node.js(ts), Nest.js(ts), Express.js, Loopback, PHP, Laravel.

Databases: MySQL, PostgreSQL, Redis, NoSQL (MongoDB), Supabase

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Nginx, CI/CD

AI/ML: Botpress, Natural Language Processing, ChatGPT Integration

Tools: Git, WebSockets, Phaser.js, OIDC, Jest, WordPress, Firebase, Expo, Figma, SEO

Education & Training

BSc.CSIT | Orchid International College (2016)
GDPR Staff Awareness | 3radical (Feb 2023)
